ORNAMENTALS

TERMS AND CONDITIONS OF SALE

PRICES: This price list cancels all previous quotations, and the prices quoted herein are subject to change without notice. Five and 50 of one size and variety at the 10 and 100 prices respectively.

TERMS: Cash with order if for immediate shipment. For a 25% deposit we will reserve stock for later shipment on a specified date (weather permitting), when balance of payment will become due. C.O.D. orders are to be accompanied by a 25% deposit.

PLANTS SELECTED by customers before end of growing season will be re-priced on delivery, based on grade at time of delivery.

TRANSPORTATION RISKS—We prefer that you specify the carrier you desire. Should you not do so we will select what we consider the most practical carrier, which is usually Railway Express. Our responsibility ends upon delivery in good order to carrier, or to you at the nursery. Remedy for loss must lie between the buyer and the carrier, but we will gladly render all the aid that we can.

PARCEL POST SHIPMENTS — On orders consisting of **bare-root plants only**, parcel post is much cheaper than Railway Express and we urge you to inclose postage so that you can enjoy the saving. We will refund amount not used. If postage is not sent, we will send amount of postage C.O.D. (plus the 25c or more C.O.D. post office charge. The post office then adds, in addition, a money order fee.) Container plants and B&B plants are usually damaged when shipped by parcel post.

MOTOR FREIGHT—On large orders of B&B or container plants, motor freight, though frequently not yet quite as dependable as Railway Express, is much cheaper, and we suggest that you inquire at your nearest motor freight line about connections and delivery time from Mobile.

SUBSTITUTIONS — We have provided a place on our order blank for you to indicate your wishes in regard to substitutions.

CLAIMS—All claims must be made on receipt of plants. We shall be glad to rectify any mistake made by us, but it is agreed that in no instance will our liability be more than the price of the plant.

QUOTATIONS—All quotations are for immediate acceptance and subject to stock being unsold.

GUARANTEE — All plants are guaranteed to be true to name and in good condition when they leave the nursery. We cannot, however, guarantee them to live, or flower, or guarantee them in any other way, as there are countless conditions beyond our control which can affect them after they leave the nursery. As all experienced growers know, there are certain Camellia varieties which, when grafted, sometimes bloom variegated even though the parent is not variegated, and for this reason we cannot guarantee grafted plants of these varieties to be true to color in this respect.

MINIMUM ORDER — The prices quoted herein are based on orders of \$4.00 or more. Should you not desire as much as \$4.00 worth of nursery stock you may make your order as small as you wish, by adding 50c to your remittance to cover part of the packing and handling costs.

PACKING CHARGES—There are no charges for packing on plants ordered from this catalog when the order is for \$4.00 or more.

SEPTEMBER MORN, one of the earliest Camellias,
blooming from September to December.

CAMELLIAS

Camellias are just beginning to approach their deserved place in the horticultural world, and certainly they belong with Orchids and Roses in the top echelon of blooms which are prized for outstanding individual beauty. Two added characteristics of Camellias place them at the very pinnacle among ornamental plants. These are, first, the lustrous evergreen beauty of the plants themselves, in either a landscape setting or in a container, and secondly, the winter-blooming habit which provides outdoor or conservatory blooms at a time when most other flowering shrubs have no blooms. Camellias cannot be adequately described in words. They have to be seen to be believed.

By selecting the proper varieties, the Camellia grower may have blooms in his garden or greenhouse from late August to early April. We have indicated the approximate blooming time for each variety listed below by the use of the symbols **E**, **M**, and **L** for early, mid-season, and late. In general, early varieties bloom before Christmas, midseason varieties from Christmas to early February, and late varieties in February and March in this area. Of course there is much overlapping, and we have marked some varieties with two symbols to indicate this. In some seasons blooms come sooner or later than their normal blooming times.

CAMELLIA JAPONICA

The species of Camellia most widely grown for ornamental purposes is **Camellia japonica**. Known in the Old South for many years as "Japonicas," plants of this species, like all the others, are native to the Orient and came to Western gardens by way of China and Japan.

DESCRIPTION OF VARIETIES

ADOLPHE AUDUSSON. (M). Very large semi-double Red, petals heavy and folded, sometimes mixed with stamens. Large, dark green leaves, vigorous growth.

ADOLPHE AUDUSSON VAR. (M). Same as above, strikingly marked with White.

AKEBONO PINK VAR. (M). Semi-double, Salmon Pink, mottled White. Blooms are not large. Plants are slow-growing, and have many small, almost dwarf leaves. We consider it a collector's item, though we doubt if our name is correct. We call the self-colored form **DOWNING PINK**.

ALBA PLENA. (EM). Large, Snow-White formal double, blooming from October through January, and one of the oldest and most outstanding Camellia varieties. Indeed, it is the classic white Camellia, and is unexcelled as a corsage flower. Plants are vigorous, with bright green leaves usually variegated yellow on the last growth of the season. **ALBA PLENA** plants have a reputation of being hurt by severe cold and we advise persons whose plantings are subjected to severe cold to take precautions.

(continued on page 4)

PRICES BEGIN ON PAGE 17

HOW TO START A COLLECTION

Are you baffled by all the variety names and synonyms of Camellias? Then let us help you select varieties to start with—varieties we ourselves would select if we were starting over. We recommend strongly the one-gallon size as a starter. These plants are large enough usually to have bloom buds, and if you leave the selection up to us we will pick varieties with buds. If you prefer, you may specify varieties from the list below, and we will do our best to send budded plants.

VARIETIES TO START A COLLECTION

PINK: Debutante, Kumasaka, Lady Clare, Rosea Superba, Thelma Dale.

RED: Arejishi, Glen 40, Mathotiana, Prof. Sargent, Victor Emmanuel.

WHITE: Alba Plena, Queen Bessie, Sept. Morn, Victory White, White Empress.

VARIEGATED: Elegans Var., Mathotiana Var., Mikenjaku, Oniji, Rosea Superba Var.

STARTING COLLECTION. Four beautiful varieties in one-gallon cans, selected for vigorous growth, excellence of blooms, and minimum need for special care.

Four Plants for **\$5.00**

COLLECTION FOR COLDER AREAS

In the "fringe" areas where people are now experimenting with Camellias outdoors—places like Washington, D. C., Atlanta, and Dallas—it is well to get varieties which are hardy, and with blooms not easily hurt by cold or which bloom early enough to escape damage. Of course if you are going to keep your plants in containers so they can be moved in and protected from cold, then you should not be concerned with cold damage.

The following varieties show promise of being hardy—both the bushes and the bloom buds—and are recommended for colder areas:

PINK: C. M. Wilson, Daikagura Red, Kumasaka, Lady Clare, Marjorie Magnificent, Sgt. Barrios.

RED: Adolphe Audusson, Glen 40, Gov. Mouton, Pearl Harbor.

WHITE: Mrs. Chas. Simons, White Empress.

VARIEGATED: Daikagura Var., Elegans, Oniji.

COLD WEATHER COLLECTION: Four Camellia varieties in one-gallon cans, especially selected for colder climates. You may specify varieties or colors, or leave selection to us.

Four Plants for **\$7.95**

All plants in the above collections will be individually labeled and are guaranteed true to name

(Shipment by Railway Express only. If you wish to prepay charges—as for a gift order—allow about \$2.50 for a 400-mile shipment of four one-gallon plants, \$3.50 for a 1000-mile shipment. We will refund any overage.)

- ALBERTI.** (PRINCE ALBERT, ELLEN McKINZIE). (M). Pink striped Carmine and sometimes with White, full peony form, similar to **DEBUTANTE** in shape. Upright growth, light green serrated leaves.
- ALICE STOKES.** (M-L). Light Pink formal double, medium size. Vigorous growth, light Green foliage.
- AMAZING.** (M-L). Medium large formal double, Purple Red.
- AN-FLO-LEE.** (M). Large, Dark Red, peony type bloom. Vigorous, upright growth.
- ANGEL'S BLUSH** (SHIN-SHIOKO). (M-L). Small, blush Pink flower of a very delicate appearance. A few small stamens peep through in the center.
- AREJISHI** (ALOHA). (Very E). Irregular double with large outer petals framing numerous central petaloids. September blooms are light, later becoming Dark Red.
- ASPASIA**—See **EMPEROR OF RUSSIA VAR.**
- ASPASIA MACARTHUR** (PAEONIAFLORA). (E-M). White to Creamy White with a few Rose Red lines and dashes. Large, loose peony form. Slow, upright growth.
- BEALII ROSEA.** (L). Full double, Rose Pink. Compact symmetrical growth. Excellent variety for landscaping.
- BEAU HARP.** (M). Very large, Bright Red peony form. Vigorous, upright growth with large, dark green leaves. This new variety has been much in demand. For variegated form see **DR. JOHN D. BELL.**
- BEAUTY OF HOLLAND** (HERMESPORT). (M). Very large, loose peony, Rose Pink with White spots or blotches. One of the outstanding sports of *Herme*.
- BEAUVOIR.** (M). Medium large, semi-double with fluted petals, Red with Purple cast.
- BELLA ROMANA** (MADAM DE STREKALOFF). (M). Irregular double, Light Pink with streaks of Red. Medium large. Vigorous bushy growth.
- BESSIE MORSE BELLINGRATH**—See **TOKI-NO-HAGASANE.**
- BETTY BOARDMAN VAR.** (M). Deep Pink and White. Large semi-double.
- BETTY SHEFFIELD.** (M). White striped and blotched Red and Pink. Large, semi-double to loose peony form with stamens mixed in slightly waved petals.
- BIG BEAUTY.** (M-L). White blotched and dashed Pink. Large, semi-double to semi-peony form. Vigorous, upright growth. **MOLLIE MOORE DAVIS** is solid pink form of this.
- BLUSH HIBISCUS.** (M). Large single to semi-double. White with Blush Pink center. Large, dark green leaves.
- BRYAN WRIGHT.** (M). Light Pink, semi-double to loose peony form with stamens mixed among petals.
- CANDIDISSIMA** (STAR WHITE). (L). Medium White double with petals often arranged in the form of a star. Slow, compact growth.
- CAPRICE.** (M). Creamy White peony, with stamens and petals inter-mixed in a high center. Vigorous, upright growth.
- CAPT. MARTIN'S FAVORITE.** (E-M). Formal double, sharply variegated Deep Pink and White. Slow, upright, compact growth.

PRICES BEGIN ON PAGE 17

- CARDINAL RICHELIEU.** (M-L). Rose Red, large irregular, semi-double to loose peony form. Vigorous, upright, compact growth.
- CASABLANCA.** (M). Beautiful Soft Pink color, rose form double.
- CATHERINE CATHCART.** (M-L). Soft Pink mottled White. Large, formal double. Slow, slender, upright growth. This is one of the varieties injured by DDT.
- CHANDLERI ELEGANS**—See **ELEGANS VAR.**
- CHARLOTTE BRADFORD.** (M-L). Phlox Pink variegated White. Sport of **MRS. BALDWIN WOOD.** (One of the trio which includes **MRS. BALDWIN WOOD** and **THELMA DALE.**) Large, irregular semi-double to rose form double. **CHARLOTTE BRADFORD** was adjudged the best flower at the 1954 show of the Men's Camellia Club of Birmingham.
- CHASTITY.** (E-M). White with Cream center. Large, full peony form. Vigorous, upright, compact growth.
- CHEERFUL.** (M). Stately, upright growth, very useful as a landscape plant, with small rose form double, deep Pink or Rose Red blooms that literally cover the bush. Beautiful dark green foliage. Ideal for use at each side of a beautiful entrance or doorway.
- CHO-CHO-SAN.** (M). Light Pink, large semi-double to semi-peony form.
- CHO-NO-HANAGATA** (ROBINSON 56). (M). White shaded Faint Blush Pink. Large, semi-double to peony form. Highly praised by most Camellia connoisseurs.
- CLAUDIA PHELPS.** (M). A beautiful Pink sport of **DUCHESS OF SUTHERLAND**, shading to White toward the outer edge and sometimes splashed White.
- CLIVEANA.** (M-L). Clear Pink, medium size peony form. Vigorous, compact growth, good landscaping or understock variety.
- CLOWER'S WHITE.** (M). White. Large, loose peony form with intermingled stamens. Vigorous, open growth.
- C. M. HOVEY** (COL. FIREY). (L). Not to be confused with **MATHOTIANA VAR.**, which was formerly sold under this name, this is a large, flat formal double. Dark Red. Growth is rather slow.
- C. M. WILSON.** (M). This sport of **ELEGANS** is a beautiful Silvery Pink, paling toward the edges to blush Pink and White. The Pink color is similar to that of **HIGH HAT**, and the Golden anthers against this background make a picture that is unbelievably beautiful.
- COL. FIREY**—See **C. M. HOVEY.**
- COLLETTI** (COLLETTI MACULATA). (E-M). Peony form, strikingly variegated Dark Red and Pure White. A very old Camellia aristocrat. Slow, bushy growth.
- COLONIAL LADY** (FRAGRANT STRIPED, WHITE HERME). (M). Sport of **HERME.** White with Rose Red stripes and flecks.
- COMTE DE NESSELRODE.** (M-L). Deep Pink striped and splotched Red. Large, semi-double to loose peony form. Medium, upright growth.
- CREPE ROSETTE.** (E-L). Deep Pink veined Red with White margined petals. Large, semi-double with twisted outer petals intermingled with stamens. Medium, compact growth.

PRICES BEGIN ON PAGE 17

Camellia DAIKAGURA

DAIKAGURA (KIYOSU). (Very E). Variegated. Frequently begins blooming as early as August, but usually starts in September or early October. Flowers are highly variable, shading from Pink to deep Red with tinges of Purple, and from loose peony type to imbricated rose form double resembling MATHOTIANA. This, the regular DAIKAGURA, is splotted with White. Other members of this family include DAIKAGURA RED, HIGH HAT, and DAIKAGURA—WARD STRAIN.

DAIKAGURA RED. (Very E). Solid colored sport of DAIKAGURA.

DAIKAGURA — WARD STRAIN. (Very E). A selected strain of DAIKAGURA, with unusually large amount of beautiful marbled White variegations.

DEBUTANTE. (E-M). Beautiful Soft Pink, large full peony form. Vigorous, upright growth. Outstanding as a corsage flower.

DONCKELARI. (M). Head of a distinguished family, whose variations include VILLE DE NANTES, LADY KAY, and others. DONCKELARI is Red marked White in varying degrees. Slow, bushy growth. We have not been very successful with own-root plants.

DONCKELARI — TEA GARDEN STRAIN. (M). This form is beautifully marbled with more White than the regular DONCKELARI.

DR. JOHN D. BELL. (M). Variegated from of BEAU HARP. Very large semi-double, Bright Red marked with White.

DR. TINSLEY. (M). Very Pale Pink at base shading to Deeper Pink at edge with reverse side Flesh Pink. Medium semi-double shaped like a wild rose. Upright, compact growth.

DR. W. G. LEE. (E-M). Dark Red. Large, round semi-double. Spreading growth.

- DUCHESS OF SUTHERLAND.** (M). White, sometimes with Pink stripe on one petal. Large, flat semi-double, sometimes with curled inner petals. Vigorous, upright spreading growth. Among the many sports of this variety are RUTH ROYER, CLAUDIA PHELPS, and DUCHESS OF COVINGTON.
- ELEANOR HAGOOD.** (L). Pale Pink, medium to large formal double.
- ELEANOR OF FAIROAKS.** (E-M). Variegated form of VEDRINE. Deep Ruby Red marbled White, loose peony form.
- ELEGANS (Pink).** (E-M). The original ELEGANS was solid Pink so the variegated form should be designated ELEGANS VAR. Specify pink or variegated when ordering to prevent confusion. See description below.
- ELEGANS VAR.** (E-M). Very large variegated, peony-form blooms that are truly "elegant." Varies, with some blooms Solid Pink, others splotted with White. Form varies from tight peony flowers having many hundreds of tiny petaloids, to a loose peony form revealing yellow stamens.
- ELIZABETH.** (L). White, sometimes striped Light Pink. Medium formal double. Vigorous, oval growth, with crisp, dark green leaves. Excellent landscape variety.
- ELIZABETH ARDEN.** (M). Soft Pink and White, striped Rose Pink and often sporting solid Pink blooms on the same bush. Medium sized semi-double to rose-form double, sometimes showing stamens.
- ELIZABETH BOARDMAN.** (M). White, large to very large hemispherical fluted semi-double.
- ELIZABETH LE BEY.** (M). Light Rose Pink, large hemispherical full peony form, with large petals and stamens intermixed with large petaloids standing erect. Vigorous pendulous growth.
- EMPEROR OF RUSSIA.** (M). Scarlet, large multi-center peony form. Upright, compact growth, with very large, dark green leaves.
- EMPEROR OF RUSSIA VAR. (ASPASIA).** (M). Scarlet, blotched with White.
- EMPRESS—See LADY CLARE.**
- ENRICO BETTONI.** (M). Clear Pink, large semi-double. Vigorous, upright growth.
- ETHEL DAVIS.** (M). Clear Pink, large, loose peony form. Much sought after.
- EUGENE LIZE (LADY JANE GREY).** (M-L). Light Rose Pink marbled and splashed white. Medium, large, semi-double to peony form. Slow, compact growth.
- FIMBRIATA (ALBA FIMBRIATA).** (E). White, similar to Alba Plena, except petals are serrated and center petals have curved-in edges. Leaves are not so long and narrow as Alba Plena, and are seldom variegated. A very choice corsage flower.
- FINLANDIA VAR. (MARGARET JACK).** (E-M). White streaked with Crimson, large semi-double with swirled and fluted petals. One of the outstanding variegated Camellias.
- FLAME.** (M). Deep Flame Red, large semi-double. Vigorous, upright, compact growth.
- FLORENCE STRATTON.** (M-L). White with some petals Solid Pink. Large formal to rose form double, with cupped inner petals. Vigorous, bushy growth, distinctive leaves.

PRICES BEGIN ON PAGE 17

- FLOWERWOOD.** (M). (Plant Patent No. 1004.) A beautiful fimbriated sport of MATHOTIANA.
- FRANCES McLANAHAN.** (M). Light Pink sport of Lady Vansittart with veined petals.
- FRANK GIBSON.** (M). White with Golden petaloids and stamens. Large peony (anemone) form.
- FRAU GEHEIMRAT OLDEVIG** (MME. CHIANG KAI-SHEK). (M). Red mottled White. Large semi-double. Slow, compact growth.
- FRED SANDER.** (M-L). Crimson, large semi-double with fimbriated twisted petals.
- FRIZZLE WHITE.** (M). White, very large semi-double, with large, wavy petals and stamens mixed.
- GEN. DWIGHT EISENHOWER.** (M-L). Deep Red, large peony to irregular double. Vigorous, compact, upright growth.
- GEN. GEO. PATTON.** (M-L). Said to be a seedling or sport of PURITY, the flower has the same exquisite double form and is Bright Pink in color.
- GIARDINO SCHMITZ.** (M). Rose Pink sport of TEUTONIA. Formal double with incurved petals. Slow growth.
- GIGANTEA.** (M-L). Very large Red marbled with White, blooms semi-double to rose form double to peony.
- GLEN 40.** (M-L). Large deep Red formal to Rose form double. An outstanding variety. Slow, compact growth.
- GLEN 40 VAR.** (M-L). The outstanding Red GLEN 40, marked with White.
- GOSHOGURUMA.** (M-L). Deep Red, large peony form. Slow upright bushy growth, with sharp attractively variegated leaves.
- GOV. EARL WARREN.** (M-L). Rose Red, large rose form double to loose peony form. Vigorous, open, upright growth.
- GOV. MOUTON** (AUNT JETTY). (M). Oriental Red, large semi-double to loose peony, sometimes blotched with White. Open, willowy growth.
- GOV. RICHARD W. LECHE.** (L). Deep Rose Pink semi-double with long, faintly Rose-lined narrow petals upright around compact, tall stamens.
- GOV. WILLIAM BRADFORD.** (M). Variegated form of PRINCE OF ORANGE. Deep orange Red blotched White.
- GULFPORT PURPLE.** (E). Crimson with Purple flecks. Large peony to irregular double. Vigorous, compact, upright growth.
- H. A. DOWNING.** (M). Large Rose Red veined Blood Red, semi-double.
- HAKU-RAKUTEN.** (M). Large semi-peony White, with curved and fluted petals. Very outstanding. Vigorous, upright growth.
- HENINGHAM SMITH.** (M). Said to be a sport of Alba Plena. Medium to large rose form double, White. Vigorous, spreading growth.
- HENRY VIII.** (M). We sold this under the name BONNIE DEE for many years. Large peony form, variegated Red and White. Very vigorous spreading growth.

PRICES BEGIN ON PAGE 17

HERME (JORDAN'S PRIDE). (M). Large semi-double Pink, with irregular White border and streaks of Deep Pink. Upright growth. There are many beautiful sports of HERME, including BEAUTY OF HOLLAND, LOOK-AWAY, and SPRING SONNET.

HERME PINK. (M). Rose Red sport of HERME.

HIGH HAT. (Very E). A beautiful sport of DAIKAGURA with flowers a delicate Silvery Pink. It has the same variation in form from loose peony to formal double as its parent.

IMPERATOR (FRENCH). (M). Dark Red, very large peony form. Upright, open growth, with distinctive large, round leaves.

IMURA. (M). Large semi-double White, with vigorous, willowy growth, long pointed leaves.

JARVIS RED. (M). Turkey Red semi-double, with bright Golden stamens inter-mingled with petaloids, often with tufted center. Opens perfectly even after severe freezes.

JORDAN'S PRIDE—See HERME.

JOSEPHINE DUELL. (M). Large Soft Pink semi-double.

JOSEPH PFINGSTL. (Plant Patent No. 927) (E-M). Dark Red. Large to very large, irregular semi-double to peony form with waved outer petals and fluted center petals. Vigorous, sturdy growth. (The variegated form of this is EMMETT PFINGSTL).

JOSHUA E. YOUTZ (WHITE DAIKAGURA). (E). Large White, peony form to formal double. Slow growth. Whether this is a real "DAIK" has been questioned.

KELLINGTONIA. (M). Red, strikingly marked with White, semi-double to loose peony form. Very dark Green foliage.

KENNY (KENNY GLEN). (L). Large Deep Rose Pink variegated White, semi-double to peony form.

KIKUTOJI. (E). Formal double, Deep Red blotched White. Rather small, and ideal for corsage or boutonniere purposes. Vigorous, bushy growth.

12-18" SEPT. MORN Camellia, and 18-24" DEBUTANTE Camellia, Specimens

- KISHU-TSUKASA** (ADMIRAL NIMITZ). (M-L). Large regular double, beautiful Pink, with an occasional petal mottled with White. Leaves similar to LALLAROOK.
- KIYOSU**—See DAIKAGURA.
- KOKURYO** (BLACK DRAGON). (M-L). Very Deep Red, large irregular semi-double to loose peony form.
- KOKURYO VAR.** (BLACK DRAGON VAR.). (M-L). Variegated form of above, deep Red and White.
- K. SAWADA** (Plant Patent No. 431). (M). Large, very double White, usually 4-5 inches in diameter. Sometimes shows a few small stamens or petals.
- KUMASAKA**. (M-L). Large rose form double to peony form, Rose Pink. Very dependable flowering variety.
- KUMASAKA VAR.** (M-L). The beautiful KUMASAKA, with variegated foliage and flowers.
- LADY CLARE** (EMPRESS). (M). Very large semi-double, Deep Pink. Large, dark green leaves. Compact spreading growth.
- LADY JANE GREY**—See EUGENE LIZE.
- LADY KAY**. (M). A sport of VILLE DE NANTES, with many more petals, twisted into a round, thick peony form, with serrated petals. Rose Pink and White.
- LADY MARY CROMARTIE**. (M-L). Large, open peony form, Deep Rose Pink.
- LADY MARY CROMARTIE VAR.** (LA REINE VAR.) (M-L). Formerly sold as LA REINE VAR., this is deep Pink spotted White.
- LADY VANSITTART VAR.** (M). White striped Rose Pink. Medium to large semi-double with broad, wavy edged petals. Slow, very upright growth, with distinctive small narrow leaves. Other forms include the solid red (see below) and FRANCES McLANAHAN.
- LADY VAN SITTART RED**. (M). Deep Pink to Red form of LADY VANSITTART.
- LALLAROOK** (LAUREL LEAF). (M-L). Large, regular double, with petals curved inward at edges. Color varies from Light Salmon Pink to Deep Rose, frequently blotched with White. Narrow, pointed leaves, deeply veined.
- LA PEPPERMINT**. (M-L). Formal double, White, striped Light Rose, some flowers Solid Rose color. This variety may be the true MRS. ABBY WILDER.
- LATIFOLIA** (GLOIRE DE NANTES). (M). Sold by us for many years as GLOIRE DE NANTES, this variety we now understand should be called LATIFOLIA. The variegated form is LATIFOLIA VAR. Large semi-double to peony, Soft Rose Red.
- LATIFOLIA VAR.** (FANNY BOLIS). (M). Variegated form of above
- LAUREL LEAF**—See LALLAROOK.
- LENA JACKSON**. (M). Medium size rose form double, Blush Pink.
- LETITIA SCHRADER VAR.** (M). Very large, deep Red peony, marked White.
- LEUCANTHA**. (M-L). Semi-double White. Vigorous upright growth.
- LIBERTY BELL**. (E-L). Very large White, loose peony, with long blooming period.

PRICES BEGIN ON PAGE 17

- LILA ROSA.** (E-L). Large, Clear Pink peony, blooming early to late.
- LINDSAY NEILL.** (E-M). Dark Red peony, sharply marked with White. Slow, open growth.
- LOOKAWAY.** (M). One of the HERME sports; Deep Rose Pink in throat with wide border of White.
- LURIE'S FAVORITE.** (M). Large, semi-double Soft Lavender Pink, with petals of crepe paper texture.
- MAGNOLIAEFLORA.** (M). Exquisite semi-double Blush Pink, with two rows of petals opening in a cupped pattern, each petal concave. Slow growth.
- MAGNOLIA QUEEN** (PRISCILLA BROOKS). (L). Large semi-double White with Red stripes.
- MARCHIONESS OF EXETER.** (E-M). Large, full peony form, Light Pink, with fluted outer petals and erect center petals, sometimes recurved. Vigorous, loose, wide spreading growth. It is not a profuse bloomer.
- MARGARET HIGDON** (ELIZABETH GRANDY). (M). Large semi-double Rose Pink or Rose Red, sometimes showing White-margined petals. Vigorous, compact, upright growth.
- MARGARET JACK**—See FINLANDIA VAR.
- MARGHERITA COLEONI** (GEN. DOUGLAS MacARTHUR, CAMBELLI, DIXIE). (M-L). Dark Red large formal double, with large round dark green leaves. Vigorous growth.
- MARGHERITA COLEONI VAR.** (M-L). Dark Red blotched White.
- MARJORIE MAGNIFICENT.** (M). Similar color to MAGNOLIAEFLORA (Light Soft Pink), but with more petals, and some stamens changed to large petaloids, semi-double to peony. Upright, compact growth.
- MARTHA BRICE.** (M). Light Lavender Pink of loose semi-double to peony type.
- MARY CHARLOTTE.** (M). Very rich Soft Light Pink, similar in color to HIGH HAT and C. M. WILSON, with broad outer petals surrounding a mass of loosely twisted center petals.
- MASTERPIECE.** (M). White, opening from Blush bud, large high centered peony to rose form double. Extremely large foliage. Vigorous, open, upright growth.
- MATHOTIANA** (PURPLE DAWN, MATHOTIANA RUBRA, PURPLE EMPEROR). (M-L). Very large rose-form double, sometimes showing stamens. Flower is Deep Red, outer edge of petals turning Purple as the flower gets older. An outstanding corsage flower.
- MATHOTIANA SUPREME.** (M-L). A sport of MATHOTIANA, with stamens interspersed among the petals.
- MATHOTIANA VAR.** (C. M. HOVEY). (M-L). MATHOTIANA as described above, marked in varying degrees with White.
- MENA LADNIER** (DUNCAN BELL). (M). Irregular double, Deep Blood Red, sometimes marked with White. Large, dark green leaves, open spreading growth with stiff branches.

QUANTITY CAMELLIA ORDERS

If you want to order five or more of the same size and variety of the bare-root Camellias ("liners"), you may deduct 10¢ from the cost per plant.

20-25" CLEOPATRA, 10-15" PINK PERFECTION, and
15-20" ALBA PLENA.

MIKENJAKU (NAGASAKI). (M). Very large semi-double, variegated Rose Pink and Snow White, petals twisted, with outer petals and a few small center petals lying flat. Believed to be same as NAGASAKI.

MME. CHIANG KAI SHEK—See FRAU GEHEIMRAT OLDEVIG.

MOLLIE MOORE DAVIS (PINK BIG BEAUTY). (M-L). Large deep Rose Pink semi-double to peony form.

MONARCH. (M). Very large hemispherically shaped peony, Deep Pink sometimes spotted White, with interspersed stamens. Round and compact growth.

MORNING GLOW. (E-M). A fine new early blooming White. Large formal double, with vigorous and upright growth. Hardier than ALBA PLENA.

MRS. BALDWIN WOOD (THUNDERHEAD). (M-L). Head of a distinguished family which includes THELMA DALE and CHARLOTTE BRADFORD. All have large, irregular semi-double to rose form double blooms of outstanding texture and form. MRS. BALDWIN WOOD is White, with usually only one petal touched or striped with Phlox Pink; THELMA DALE is the solid Phlox Pink sport, and CHARLOTTE BRADFORD is Phlox Pink variegated White.

MRS. BERTHA HARMS. (M). Semi-double with 14 wavy, creped petals and over 100 stamens. Very large, shading from Pure White to a Soft Delicate Pink.

MRS. CHAS. COBB. (E-M). Large peony, Dark Crimson with Golden stamens. One of the darkest colored Red Camellia varieties. Lush, dense foliage.

MRS. CHAS. SIMONS. (M-L). Large to very large White blooms, varying from semi-double to loose peony form. Very vigorous, compact spreading growth, light green foliage.

MRS. FREEMAN WEISS. (M). Large loose semi-double to peony of Rich Pink color, with wavy petals and intermixed stamens and petaloids.

- MRS. K. SAWADA** (Plant Patent No. 481). (M). Complete regular double, medium size, of very light delicate Pink color. Described as superior to **LADY HUME'S BLUSH**. Vigorous, upright, compact growth.
- MRS. TINGLEY**. (M-L). Large formal double, Salmon Pink. Compact in growth.
- NAGASAKI SPECIAL**. (M). A beautiful form of **NAGASAKI** (or **MIKENJAKU**), with unusual variegations in a marble pattern, and beautifully variegated foliage.
- NINA AVERY**. (M). Semi-double to peony form, with crinkled, erect central petals irregularly mixed with White stamens, tipped Light Brown. White, washed Rose Pink.
- ONJI** (**LADY CLARE VAR.**). (M). The large semi-double Deep Pink **LADY CLARE** beautifully variegated White.
- OTOME**. (M-L). Light Pink formal double. Slow, spreading growth.
- OTOME VAR.** (M-L). Soft Pink formal double streaked White.
- PAULETTE GODDARD**. (M-L). Very large Dark Red semi-double to loose peony form. Vigorous, upright growth.
- PEARL HARBOR**. (L). Large irregular semi-double, dark Red. Vigorous, compact, upright growth.
- PINK BALL**. (M). Soft Pink, full peony form. Vigorous, compact, upright growth.
- PINK PERFECTION** (**FRAU MINNA SEIDEL**). (E-L). Perfect double blooms of Clear Shell Pink, flowering profusely from November through March. This is one of the most widely popular *Camellia* varieties.
- PINK STAR VAR.** (M). Large semi-double Rose Pink and White with pointed outer petals in something of a star shape, and stamens among central petaloids.
- PRINCE EUGENE NAPOLEON** (**POPE PIUS IX**). (M). Large regular double, varying from Light to Deep Red, sometimes tipped with White.
- PRINCE OF ORANGE** (**CRUSADER**). (M). Large to very large loose to full peony, Deep Orange Red. Vigorous, compact growth. (**GOV. WILLIAM BRADFORD** is the variegated form of this.)
- PROF. C. S. SARGENT**. (M). Medium to large Crimson, of distinctive full peony or "pom-pom" form. Free bloomer, hardy. Vigorous, compact, upright growth.
- PURITY**. (L). This rose form double White, is different from **ALBA PLÆNA** in that the petals are slightly tiered, and small White petals sometimes appear. Slow, upright growth, dark green leaves.
- PURPLE DAWN** or **PURPLE EMPEROR**—See **MATHOTIANA**.
- QUEEN BESSIE**. (L). Large, wavy, semi-double White, with a faint blush of Pink in the center. Vigorous, compact, upright growth.
- RAINY SUN**. (M). Large Rose Pink, loose semi-double with feather-edged petals, and narrow serrated leaves.
- RASEN-ZOME**. (M-L). Semi-double to peony form, of an unusual Light shade of Rose Pink, sometimes mottled White. Dark Green, heavily veined leaves, frequently variegated. Vigorous, upright growth.

PRICES BEGIN ON PAGE 17

- RED CRINKLEY.** (L). Rose Red peony form, rapid growth. Excellent landscaping variety. Covered with blooms at Azalea time.
- RED HIBISCUS.** (E). Usually semi-double, but sometimes stamens are transformed into petaloids. Large, Deep Pink to Bright Red, blooming early. Upright growth.
- RED WONDER.** (M). This sport of MATHOTIANA is a deep Red, very large, irregular Rose form double, with two or three rows of flat outer petals and long folded and curled inner petals.
- REV. JOHN BENNETT.** (M-L). Large semi-double of beautiful Salmon Pink, petals veined, and occasional petaloids. Slow, spreading growth.
- REV. JOHN BENNETT VAR.** (M-L). Semi-double Salmon Pink variegated White.
- ROBERT E. LEE.** (M). Large loose irregular semi-double with a few petaloids. Dark Red, with Darker Red veins and Red stamens.
- ROBERT NORTON.** (E-M). Large semi-double White, with usually only one or two narrow Pink stripes. Medium, compact growth, dark green foliage.
- ROSARY (FINLANDIA F. N., PINK GLORY).** (M). Beautiful large loose semi-double light Rose Pink, with long, narrow petals. Medium, loose, upright growth.
- ROSARY VAR.** (M). Variegated form of ROSARY.
- ROSEA SUPERBA.** (M-L). Truly "superb," this is a Pink sport of MATHOTIANA. Very large rose form double. Vigorous, compact, upright growth.
- ROSEA SUPERBA VAR.** (M-L). Marked in varying degrees with White.
- ROSE DAWN.** (E-L). Medium large rose form double to regular double, Deep Rose Pink, blooming freely even when young. We have blooms from November through March.
- ROSE DAWN VAR.** (E-L). Marked in varying degrees with White.
- ROSE QUEEN VAR.** (M). Medium large formal double, Rose Pink spotted White. Vigorous, bushy growth.
- ROSS (PRIDE OF HOUSTON).** (L). Large loose semi-double to peony, Salmon Pink with White specks.
- ROSULARIS.** (M). Large loose peony Blush Pink (almost White) blotched, striped and flecked Rose Pink, many of the flecks being pin point size. Very vigorous, compact, upright growth, with large handsome foliage. This is not MARCHIONESS OF EXETER VAR.
- RUBRA ROSE.** (M). Deep Red medium large peony.
- RUTH ROYER.** (M). A sport of DUCHESS OF SUTHERLAND, with delicate shading from Clear Pink to Pure White. (Similar to CLAUDIA PHELPS.)
- SAINT ANDRE.** (M-L). Very large Bright Red semi-double to peony, very distinctive. Medium, compact, upright growth.
- SARAH FROST.** (M-L). Crimson, varying to Deep Rose Pink, imbricated double. Free bloomer, compact and vigorous. An old favorite.
- SARA-SA.** (M). Large semi-double, Flesh Pink dotted and striped with Darker Pink. Vigorous, upright, open growth.
- SCARLETT O'HARA (C. M. HOVEY VAR., COL. FIREY VAR.).** (L). A sport of the true C. M. HOVEY, blotched with White. Large, Deep Red formal double. Slow growth.

PRICES BEGIN ON PAGE 17

- SCENTED TREASURE.** (M). A sport of HERME, with Rose Red to Wine Red, peony form flowers. Medium, compact growth, and fragrant.
- SEPTEMBER MORN** (YOHEI-HAKU). (Very E). Large formal double to peony form, White, with outer petals frequently tinted in a Light Pink blush. Medium, spreading growth.
- SERGEANT BARRIOS.** (M). Very large semi-double Rose Red. Vigorous, upright growth.
- SHIRO-DAIKAGURA.** (Very E). White, irregular double to peony form. Not a form of the true DAIKAGURA. Medium, compact growth.
- SHOWA-NO-HOMARE.** (M). Very large single White, petals slightly creped.
- SHU-BENI-HITOE.** (M). Medium large flower, single, with Deep Crimson rounded petals, and central anthers frequently enlarged to small Pink-White petaloids.
- SIMEON.** (E-M). Very large Pink semi-double to semi-peony form, with large petals and a high center intermixed with stamens. Vigorous, upright growth.
- SMILING BEAUTY.** (M). Delicate Pink semi-double of a deeper shade than MAGNOLIAEFLORE. Medium upright growth.
- SNOWDRIFT.** (M). Semi-double White, very perfect symmetrical blooms which stand severe cold without injury. Small twisted leaves. Vigorous upright growth.
- SWEET SIXTEEN.** (M). Light Pink semi-double with Green anthers at tips of stamens.
- TALLAHASSEE GIRL.** (E). Semi-double to semi-peony form, Blush Pink. Upright growth.
- TE DEUM** (DR. SHEPHERD, FIREGOLD). (M-L). Very large Dark Red with outer petals surrounding a loose peony to formal center. Slow open growth.
- THELMA DALE.** (M-L). Outstanding Pink sport of MRS. BALDWIN WOOD. Large irregular semi-double to loose peony to rose form double, of a beautiful delicate Phlox Pink color. (The variegated form of this Solid Pink sport is CHARLOTTE BRADFORD.) Adjudged the best flower at the 1954 shows in Covington, Gulfport, and Jackson.
- TINSIE.** (M). Central mass of White petals are surrounded by Red outer guard petals making a most unusual appearance. Small, anemone form. Vigorous, upright growth.
- TOKI-NO-HAGASANE** (BESSIE MORSE BELLINGRATH). (M-L). Large semi-double White with faint blush of Pink, with deeper Pink under petals. Many blooms are complete double. Slow, compact growth.
- TRICOLOR.** (L). Beautiful semi-double blooms, White striped Red, some all Red, others nearly solid White. Growth habits of LEUCANTHA.
- VALTEVAREDA.** (L). Cup-shaped, formal double, Pink shading to Deeper Pink on outer petals.
- VASHTI.** (M-L). Rather small, rose-form double, with both variegated White and Pink, and solid Red flowers. Ideal small corsage or boutonniere flowers.
- VEDRINE.** (E-M). This is the Solid Ruby Red form of ELEANOR OF FAIROAKS. Large, brilliant Ruby Red anemone to loose peony form. Upright, open growth.

PRICES BEGIN ON PAGE 17

- VICTOR EMMANUEL (BLOOD OF CHINA).** (L). Large semi-double to loose peony Salmon Red. Very late. Compact, spreading growth.
- VICTORY WHITE.** (M). One of the best Whites. Large semi-peony form, with central mass of mixed stamens and petaloids. Vigorous, upright, open growth.
- VILLE DE NANTES.** (M). Still the most popular and outstanding show-flower of all Camellias. Large semi-double, with some petals often partially or wholly fimbriated, some petals Deep Red and others often almost entirely White. Inner petals are often creped, with center petals in some flowers standing upright to resemble rabbit ears. Blooms vary greatly—even on the same bush. Received twice as many first prizes in the 1954 shows as the next contender. Slow, compact growth. (LADY KAY is a sport of this variety).
- VIRGINIA DAVIS.** (M). Large formal double White. Vigorous, upright growth.
- VIRGIN'S BLUSH.** (M). This is a White flower lightly flushed with Delicate Pink, petals arranged in imbricated fashion and a group of short stamens and petaloids enclosed within the cup-shaped center petals. It is a medium sized bloom of semi-double to peony form.
- WHITE EMPRESS.** (E-M). One of the best of the informal Whites, with large petals of good texture, somewhat twisted, one or two mixed through the central stamens. Very large semi-double, with fluted petals. Vigorous, compact, upright growth.
- WHITE GIANT.** (M). Very large semi-double White. Vigorous, upright growth.
- WHITE KING.** (M). Semi-double White, with large thick petals arranged in a more regular fashion than those of WHITE GIANT.
- WHITE PRINCESS.** (M). Cream White, large peony form. Vigorous, upright growth.
- WHITE QUEEN.** (E-M). Large semi-double White, with rather small and pointed petals. Vigorous, compact, upright growth.
- WOODVILLE RED (MARTIN ROBERTS, KOLLOCK)** (M). Very large semi-double to peony, deep Strawberry Red. An outstanding variety in size, form, and color. Slender grower, with pendent foliage. The bloom is so outstandingly beautiful that it deserves a place in every Camellia planting, in spite of the rather unattractive foliage.

ORDERING GRAFTS OR SPECIMENS

Grafts and specimens are ordinarily shipped "B&B", which means "balled and burlapped". Some of the grafts are growing in 4-gallon cans, however, and will be shipped in the cans. If you desire, you may specify containers in ordering grafts or specimens and we will comply with your request even if we have to dig plants from the field and place them in cans or tubs before shipping. We have been successful with this procedure, and it often makes possible lighter shipping weights in the larger sizes. In the summer we hold any such newly dug plants in dense shade for three or four weeks before shipping.

We ship container plants of all sizes twelve months of the year.

CAMELLIA SASANQUA

The hardy Sasanqua species of Camellia is now available in a number of different colors and forms, and is especially recommended for areas where it might be too cold for Japonicas. The group as a whole is vigorous in growth, and has smaller leaves and smaller blooms than the Japonicas, though they bloom more profusely. Appearing in October, November, and December, the blooms come at a time when they are not apt to be hurt by freezing weather. Sasanquas are very desirable for landscape purposes, and the flowers make wonderful garden displays and are useful for indoor arrangement in vases since they are borne on long stems.

BRILLIANCY (E). Light Rose Pink single. Compact, upright growth.

BUTTERFLY (WHITE BUTTERFLY). (Very E.). White single with Pink margin. Vigorous, upright growth.

CLEOPATRA. (E). Rose Pink semi-double to peony. Compact, upright growth.

COVINGTON (MISS AUBURN, OLEIFERA). (E). A sport of McIlhenny's "Oleifera" variety of Sasanqua, originally occurring in the Katz collection. Characterized by its flatness and darker, Lavender-Rose border. This is a striking single flower and quite distinct from the cup-shaped and paler colored NARUMI-GATA.

CRIMSON BRIDE (E). Dark Red single.

DAWN (E). Ivory White edged in Flesh Pink (which is mainly on the back of the flower, suffusing through to the front), semi-double in form. Upright, symmetrical growth. Said to be a hybrid variety, and not a true Sasanqua.

FLORIBUNDA (E). White single, edged Lavender. Vigorous upright and compact growth.

HIODOSHI (E). Large single, broad petals. Ours is the solid Red type, and very striking.

HIRYO-NISHIKI (E). Semi-double Cherry Red blotched with White, petals usually waved and crinkled.

JEAN MAY (E). Large double Shell Pink.

LAVENDER QUEEN (E). Lavender Pink single, large blooms.

MAIDEN'S BLUSH (E). Pink single, rapid growth.

MINE-NO-YUKI (SNOW ON THE MOUNTAIN) (E). Medium large double White, some in shape of a carnation, others occasionally formal. Rapid, spreading growth.

PINK SNOW (E). Large semi-double Pink with trace of Lavender. A variation of MINE-NO-YUKI, it has the same growth habits.

ROSEA (E). Large Deep Pink single, twisted petals. Very early.

SETSUGEKKA (E) White semi-double with tint of Pink.

SHISHI-GASHIRA (E). A fine new dwarf Sasanqua. Dark Crimson Red, semi-double to double. Compact, slow growth.

SHOWA-NO-SAKAE (E). Loose peony to irregular double type bloom. Soft Pink, with some White variegation. Dwarf in growth.

SLENDERLEE (E). Watermelon Pink single. Fast upright growth, with slender, willowy branches; hence the name.

SASANQUA PRICES ON PAGE 28

AZALEAS

Azaleas fall under the generic head **Rhododendron** and are cousins of the "true" **Rhododendron**. There are many different kinds. Some are suitable only to the lower South, while others are hardy as far north as the New England states. They comprise many different types of growing habits, ranging from the slower growing Kurumes often called "dwarf" Azaleas, to the Hardy Japanese and Indica types which sometimes attain a height of 10 to 12 feet. The hardiness of each type, and its growing habits are discussed under individual group headings.

INDICA AZALEAS

The **Indica Azalea** blooms are very large and single and the varieties presented here offer a wide range of colors. Indica Azaleas will exist in soils which are not as well drained as demanded by Kurumes but they will do better in well-drained soils. They are at home in the acid coastal soils and there are bushes over one hundred years old in Mobile, Charleston, and other coastal areas, with a spread of more than 25 feet in diameter. They are doing well apparantly without any special attention, and are a living illustration of how perfectly at home they are in the coastal areas of the South. Many people are starting to try Indica Azaleas in areas which have much lower temperatures.

ELEGANS. (Very E). Light pink. Upright and fast grower. Earliest of our well-known Indica varieties. 8-12", 12-18", 18-24".

FIELDER'S WHITE. (E-M). These early, white blossoms provide an effective contrast to other varieties in group plantings. The compact growth and large flowers make it one of the best whites. All sizes.

FISHER'S PINK. (M). This light pink variety blooms rather later than **ELEGANS**, providing a light-colored bloom to blend with the **PRIDE OF MOBILE**. All sizes.

FORMOSA. (M). This vigorous and hardy grower, with its large, purple-rose flowers and dark leaves, is a favorite for background and screen plantings. All sizes except 4-6".

GEORGE L. TABOR. (M). The flesh pink blooms with their delicate deep pink markings make this hardy, fast-growing, mid-season bloomer outstanding among the newer varieties. All sizes through 18-24".

INDICA ALBA. (M). Inclined toward upright growth, the pure white flowers in mid-season are striking against the dull colored hairy foliage. Hardy. All sizes.

LAVENDER LIGHT. (Very E). An early blooming variety, this kind has a more delicately colored lilac bloom than **ELEGANS**, but otherwise is similar. All sizes except 4-6".

MAXWELL WHITE. (M). Large, white with long petals; upright growth. 4-6", 6-8".

PHOENICEA. (M). Purple rose or lavender, somewhat darker than **FORMOSA**. Fast grower with medium sized leaves; hardy. 6-8", 12-18", 18-24", 2-3'.

PRESIDENT CLAY. (E-M). Orange red, with good upright growth. 4-6", 6-8".

PRIDE OF DORKING. (L). These clustering, deep wine red blossoms provide a new thrill late in the season. A good grower, it is not one of the hardiest. All sizes through 12-18".

PRIDE OF MOBILE. (M). This practically perfect mid-season bloomer, with its mass of deep, watermelon pink flowers, and hardy, fast compact growth, defies adequate description. Originally called ELEGANS SUPERBA. All sizes.

PRINCE OF ORANGE. (M-L). A low, very bushy grower, this mid-season to late bloomer is a nice shrub even without its exotic, deep orange-red flowers. All sizes through 18-24".

SALMON. (LAWSAL, DAPHNE SALMON, PRIDE OF SUMMERVILLE). (M). This hardy, rather slow grower is very popular with its mid-season salmon-colored blooms. 6-8", 12-18".

SOUTHERN CHARM. (JUDGE SOLOMON). (M). An excellent newer variety, with deep pink blooms. It is a sport of FORMOSA and has the same excellent growth habits. All sizes through 18-24".

HARDY JAPANESE AZALEAS

This group of Kaempferi, Macrantha, and other hardy Azaleas can be grown over a large part of the United States, being very much at home in New England where some are deciduous. They are relatively fast growers and are a match for the Southern Indicas in size and showiness. Blooms are large and the foliage is small and glossy dark green, making the plants most desirable for landscaping.

FLAME. (E). Fast, upright grower, with bright orange-red single flowers. Actually a Kurume variety, but placed in this group because of its growth habit. 4-6", 6-8".

KAEMPFERI. (L). Evergreen in the South, this Azalea loses its leaves farther North. It has large, single red flowers. Hardy to Massachusetts. 4-6", 6-8", 12-18", 18-24".

LILACINA. (M). Very delicate lilac color, with delightful fragrance and good growth, hairy leaves. All sizes to 12-18".

MACRANTHA DOUBLE. (L). Large, clear pink double flowers. The Macrantha varieties are very late, extending the Azalea season in this area to May and June. All sizes to 18-24".

MACRANTHA ORANGE. (L). Similiar to above, with orange-red single flowers and slow, dwarf growth. Note that this variety sells at same prices as Kurumes. 3-5", 5-7", 6-8".

MAXWELLI. (M-L). This variety is the equal of the Indicas in dense growth habit and large size blooms, yet is much hardier. Carmine-red single flowers. All sizes to 18-24".

BELTSVILLE AZALEAS

This group of Azaleas, developed at the United States Department of Agriculture experiment station at Beltsville, Maryland, is one which shows great promise toward broadening the selection of kinds to those in the colder areas, and we are offering three varieties for sale this year for the first time. We have ten others which we hope to offer in the next year or so. Descriptions are from U.S.D.A. releases.

H. H. HUME (No. 224). This is a hybrid obtained from the cross INDICA ALBA x SNOW. The plant is moderately branched, erect-spreading with foliage partially persistent, depending on temperatures encountered. Flowers are white, with a faintly yellowish throat, hose-in-hose; and are considerably larger than SNOW, being 2 inches across. They are borne 2 to 5 per cluster. Hardy in New England and making an especially fine plant in the South, Southeast, and in California. It is also acceptable as a greenhouse forcing variety.

ROSE BANNER. (No. 126). This variety was obtained from crossing KAEMPFERI x SNOW. Open growth, with spread about equal to height. Foliage very similar to SNOW. Flowers are hose-in-hose, about 1½ inches across, rose colored, with dark pink spots in the throat. It has proved to be as hardy as its parents.

WHITE BANNER. (No. 136). This variety is a sister seedling to ROSE BANNER. Plant is vigorous, with a tendency toward producing a low-spreading growth, often being only half as tall as broad. Foliage very similar to SNOW, but larger. Flowers are hose-in-hose, about 1-1¼ inches across. White with a faint yellowish tinge in the throat.

5-7" 2-yr. plants, upright, budded45	3.50

KURUME AZALEAS

Kurume Azaleas are slow growing, sometimes called "dwarf," and are often seen in borders along walks and in planting around or in front of larger Azaleas, in rock gardens, and in beds. They are adapted to a great variety of uses. Kurumes will eventually reach a height of 4 to 6 feet, however, unless kept pruned back. They are hardy all over the South and as far north as New Jersey and Long Island. Extensively used by florists as pot plants, and in the North they bloom for them at Easter time. The individual blooms are small in comparison to the individual blooms of the Indicas, but the Kurume blooms are borne in greater profusion and in clusters. Some blooms are single, while others have two rows of petals and are described as "hose-in-hose." You will note the wide range of colors.

APPLE BLOSSOM. (M). Hose-in-hose blooms that are white shaded pink, the color of apple blossoms. 5-7", 6-8".

CHRISTMAS CHEER. (E-M). Small, bright red hose-in-hose blooms; compact growth. All sizes through 10-12".

CORAL BELLS. (M). Dainty hose-in-hose coral pink blooms, shading deeper toward center. Small, glossy leaves, vigorous growth. All sizes.

DOUBLE MAUVE. (M-L). Mauve is a delicate shade of violet or lilac. Beautiful hose-in-hose blooms cover entire plant. 3-5", 5-7".

HEXE. (M). Deep crimson red hose-in-hose blooms, somewhat larger than CHRISTMAS CHEER. Compact growth. Probably a Kurume hybrid. 3-5", 5-8", 6-8".

HEXE DE SEFFELAERE. (M). A Belgian hybrid variety (Prof. Wolters x Hexe), it is an improved type of HEXE with perhaps more vigorous and upright growth. 3-5", 5-7", 6-8", 8-10".

HIAWATHA. (M). Crimson-carmine, perhaps not strictly a Kurume, but similar in growth. Beautiful hose-in-hose blooms. 6-8" only.

HINO CRIMSON. (M). Similiar to HINODEGIRI, with very rapid growth. 6-8" only.

HINODEGIRI. (M). One of the most popular reds. Very compact grower and covers itself with showy bright red single blooms. One of the most sought after for pot plants and borders. All sizes to 12-18".

HORTENSIA. (M). Large hose-in-hose soft pink blooms, produced in large trusses. 3-5", 5-7", 6-8".

PINK PEARL. (M). Salmon-rose shading lighter toward center. Large hose-in-hose blooms, produced in clusters. Rapid growth. 3-5", 5-7", 6-8".

SALMON BEAUTY. (M). Large hose-in-hose salmon pink blooms, with large, glossy light green leaves. Compact growth. 3-5", 8-10".

SNOW. (M). Pure white hosen-in-hose blooms in clusters. Good size glossy leaves, low compact growth. All sizes.

PERICAT AZALEAS

Very similar to the Kurume Azaleas, the Pericats are rapidly growing in popularity. The partially open buds present a very distinct and different appearance, like that of a miniature rose. All varieties are compact, vigorous, and hardy. They are used in every way that the Kurumes are used, and in addition to the spread of climate which the Kurumes will take, the Pericats seem to be doing nicely as far south as southern Florida.

GARDENIA SUPREME. (M). White. hose-in-hose, formed like a small gardenia. Dark green foliage, vigorous growth. 3-5", 12-18".

MME. PERICAT. (L). Large flesh pink, hose-in-hose, rapid growth. 3-5", 5-7", 6-8".

SWEETHEART SUPREME. Blush pink, the shade of a sweetheart rose, hose-in-hose blooms and large, rounded, dark green leaves; compact growth. All sizes through 10-12".

Broad-Leaved Evergreens

Abelia grandiflora. A good evergreen with long slender branches and small glossy leaves bearing clusters of small white bell-shaped flowers in the summer.

	Each
12-18" gal. cans	\$1.00

Ardisia crenulata. One of the best plants with red berries for Christmas decorations. An evergreen with long thin folded leaves, it is not very hardy and if kept in a container may be taken in during freezing weather.

	Each
8-12" in. qt. cans	\$.75
12-18" in. gal. cans	1.75

Buxus Harlandi (Harland Boxwood). A fine new dwarf box, dark green in color. Excellent for bordering walks.

	Each	10
4-6" Bare-root	\$.35	\$2.50
6-8" Bare-root70	5.00

Buxus japonica (Japanese Boxwood). A fast growing boxwood frequently used for hedges.

	Each	10
4- 6" Bare-root	\$.20	\$1.25
6- 8" Bare-root30	2.25
12-18" gal. cans90	8.50
18-24" B&B	2.50	22.50

Buxus sempervirens Suffruticosa (English Boxwood). The real old-time Southern edging box, beautiful with its compact form and dark green leaves. This type is very slow growing and hence the same size plant costs more than a fast growing box.

	Each
6- 8" qt. can	\$.60
12-18" B&B or 4-gal. can	2.50
18-24" B&B or 4-gal. can	3.50

Callistemon (Bottle-brush). This evergreen shrub has bright red blooms, bristling out from the stems like a bottle brush in early spring.

	Each
6- 8" Bare-root	\$.50
18-24" gal. cans	1.00

Eriobotrya japonica (Loquat). Small evergreen tree or shrub for home garden fruit in the Deep South. Plum-like, the yellow or orange fruit are delicious raw or in pies, preserves, etc. Has fragrant white flowers in the fall, followed by fruit in the spring. Very ornamental.

	Each
8-12" Bare-root	\$.50
12-18" gal. cans	1.00

Euonymous japonicus Vari. Dark green glossy leaves beautifully variegated yellow. A good plant for screens or hedges, with rapid growth. Not hardy north of Philadelphia.

	Each	10
8-12" Bare-root	\$.50	\$3.50
12-18" B&B	2.50	

Fatshedra (Fatsia X Hedera). Evergreen shrub of sub-tropical appearance.

	Each
Well-branched plant in gal. can	\$1.00

Feijoa sellowiana (Pineapple Guava). A good evergreen from Brazil with red and white blossoms followed by aromatic and edible fruit.

	Each
18-24" gal. cans	\$1.00

Gardenia fortunei. Ever-blooming gardenia with dark, shiny green foliage.

	Each
18-24" gal. cans	\$1.00

Gardenia jasminoides (Cape Jasmine, Gardenia Florida). Fragrant "Cape Jasmine" of Southern gardens.

	Each
8-12" qt. cans	\$.50
12-18" gal. cans	1.00
18-24" 4-gal. can or B&B	2.50

Gardenia radicans. A dwarf Gardenia with small leaves and small, fragrant flowers.

	Each	10
4-6" qt. cans	\$.50	\$3.50

Ilex cornuta Burfordi. This highly desirable Chinese holly has red berries and leaves with usually only a single spine at the tip. Very glossy, dark green appearance.

	Each	10
6- 8" Bare-root	\$.25	\$1.50
12-18" gal. cans95	
18-24" B&B	2.50	
2-3' B&B	3.75	

Prices of larger sizes on request

Ilex cornuta Rotunda. A dwarf form of Chinese holly which does not grow taller than 2½ feet, with a spread three times the height. Leaves are small, dark glossy green, with many spines. Plant does not have flowers or berries. Excellent for very low foundation plantings, edgings for terraces, and other places where low dense evergreens are desired.

	Each
From 2½" pots	\$.50
10-12" B&B	2.75
12-15" B&B	3.75

Ilex crenata Convexa (Bullata). A good slow-growing Japanese holly with small glossy convex leaves. The dwarf hollies are coming into wider use in modern, low plantings that harmonize with ranch-style architecture.

	Each	10
8-12" Bare-root	\$.35	\$3.00
Gal. cans	1.10	

Ilex crenata Rotundifolia. Round leaf Japanese holly. A good compact evergreen, that can be sheared to any shape. Hardy and bears black berries.

	Each	10
6-8" Bare-root	\$.30	\$2.50
6-8" qt. cans, well branched60	4.50

Ilex opaca East Palatka. Varieties of American holly are being used more and more where a small evergreen tree is desired. They are excellent for tall screens, borders to driveways, etc. In addition, the foliage and berries are used extensively in flower arrangements and decorating. Variety East Palatka has bright green leaves almost without spines, and dark red berries.

	Each	10
8-12" qt. cans	\$.50	\$3.50
15-18" gal. cans	1.50	

Larger sizes f.o.b. the nursery; prices on request

Jasminum primulinum (Primrose Jasmine). This rapid grower provides a lovely cascade of willowy curved branches that bear pretty pale yellow flowers in early spring.

	Each	10
2-yr. plants, Bare-root	\$.35	\$2.00

Kalmia latifolia (Mountain Laurel). Native over much of the South, this colorful shrub provides pink bell-shaped blossoms of great delicacy in mid-spring after most of its Azalea cousins have finished blooming.

	Each	10
8-12" qt. cans	\$.50	\$3.50

Ligustrum lucidum Compactum (Wax-leaf Privet). Most versatile of broad-leaved evergreens, as it grows very rapidly and can be used for hedges, foundations plantings, or specimen groups. Our type of privet is particularly healthy and disease-free, and has flat, waxy-green leaves.

	Each	10
12-18" Bare-root, well branched	\$.40	\$2.50
12-18" gal. cans75	
2-3' B&B	2.50	

Magnolia grandiflora (Bull Bay). The Southern Magnolia, with large dark green leaves measuring 7-9" in length, and fragrant flowers in late spring. Hardy to Philadelphia.

	Each	
8-12" Bare-root	\$.35	
12-18" gal. cans95	
18-24" gal. cans	1.50	
2-3' 4-gal. cans	2.25	

Michelia fuscata (Magnolia fuscata, Banana Shrub). Sweet smelling yellowish blooms in mid-spring make this fast-growing shrub with light green leaves very popular.

	Each	10
8-12" qt. cans	\$.50	\$3.50
12-18" gal. cans90	
18-24" 4-gal cans	2.00	

Nandina domestica (Heavenly Bamboo). Very fast growing evergreen with red berries in winter.

	Each	
18-24" B&B	\$2.00	

12-18" Ilex cornuta Burfordi and 12-18" Wax Privet in gallon cans.

Nerium oleander (Oleander). Popular deep South plant that seems to thrive in sandy locations where nothing else will. Blooms in late spring. We have the Cardinal variety.

	Each
18-24" gal. cans	\$1.10

Osmanthus fragrans (Sweet Olive). Tiny white fragrant blooms coming out at intervals all winter long make this a fitting companion to the winter-flowering Camellias which usually have no aroma.

	Each
8-12" qt. cans	\$.50
18-24" gal. cans	1.00

Osmanthus ilicifolius (O. aquifolium). Small, holly-like leaves, and sweet-smelling, yellow blooms make this a very interesting garden species. Upright, open growth.

	Each	10
4-6" Bare-root	\$.45	\$3.50
6-8" qt. cans60	

Photinia glabra (Red-top). A shrub of widely increasing use, as it can be pruned as a hedge plant or allowed to grow into a small tree. The outstanding characteristic is the wine-red color of the new foliage.

	Each	10
8-12" Bare-root	\$.35	\$1.75
8-12" qt. cans50	3.50
12-18" gal. cans	1.00	

Photinia serrulata. Hardy evergreen with large leaves that turn various shades of red in the fall.

	Each	10
8-12" qt. cans	\$.60	\$4.50
12-18" gal. cans	1.50	

Pittisporum tobira.

Pittisporum tobira Var. Attractive evergreen plants with small fragrant blooms in April. The variegated form has leaves edged in yellow and grows much slower.

	Each	10
8-12" Bare-root (Var. is 6-8")	\$.35	\$2.50
12-18" qt. cans (Var. is 8-12")75	

Prunus laurocerasus Caroliniana (Cherry Laurel). Attractive native broad-leaved evergreen tree with glossy foliage.

	Each
18-24" gal. cans	\$1.00

Pyracantha crenato-serrata Graber (Graber's Firethorn).

This variety is described as the finest red *Pyracantha* grown. The plant is large and vigorous with big glossy foliage, and bears bright crimson berries in large clusters that stay on all winter. A profusion of small white flowers appears in the spring. It is hardy to about 10 degrees above zero. Since our *Formosana* stock was injured by the 1950 cold, we are now propagating this variety only. Plants listed below now have berries.

	Each	10
8-12" qt. cans	\$.50	\$3.50
12-18" gal. cans	1.00	

Quercus acuta. Fast growing Japanese evergreen oak with large, bright glossy green leaves.

	Each
18-24" gal. cans	\$1.00

Quercus virginiana (Live Oak). The spreading Southern live oak.

	Each
18-24" gal. cans	\$1.00
4-5' Bare-root	3.50

Thea sinensis (Tea Plant). The commercial tea plant of the Orient, this evergreen is a close cousin of the *Camellia*, and has small, single blooms in the fall. A worthy addition to any garden.

	Each
12-18" B&B	\$1.95
18-24" B&B	2.95

Viburnum odoratissimum. Very rapid grower with light green leaves and fragrant creamy-white blooms in mid-spring.

	Each
12-18" gal. cans	\$1.00
18-24" B&B225

Viburnum tinus (Laurestinus). Produces a profusion of fragrant creamy white flowers in early February. A good plant for hedges.

	Each
18-24" 4-gal. cans	\$3.00

ORDERING PLANTS IN CANS

It is not practical to ship plants growing in cans by parcel post. If you live beyond the Railway Express delivery limits, we recommend that you drive in to the Express office and pick up your plants. If you cannot do this, we will fill your orders for container plants to be shipped parcel post by removing plants from cans and shaking most of the soil off the roots before packing.

Our cartons for shipping canned plants hold nine quart cans, four one-gallon cans, or one four-gallon can. By ordering in these multiples when shipment is by Railway Express, there will be a saving in weight and bulk.

On March 6, 1954, Mobile awoke to find itself under a mantle of snow which continued to fall until 9 or 10 a.m. Camellias and Azaleas were a riot of color the next day, completely unharmed.

Coniferous Evergreens

Cedrus deodara. A handsome, evergreen small tree, with bluish, graceful branches, and slender trunk that seldom stands quite erect.

	Each	10
8-12" Bare-root	\$.35	\$2.50
12-18" gal. cans	1.10	

Chamaecyparis thyoides Ericoides (Retinospora ericoides, Sugar-loaf cypress). Tall columnar grower, with green foliage turning bronze in winter.

	Each
12-18" gal. cans	\$.90

Cunninghamia lanceolata. This tall-growing blue Chinese fir, sometimes called Monkey Pine, is seen along the main streets of Jackson, Alabama, and other towns near the Gulf Coast. It grows tall, very erect, and the branches are horizontal with sharply tipped foliage. The main stem does not appear immediately, and young plants are sometimes of rambling growth.

	Each
8-12" qt. cans	\$.60
12-18" gal. cans	1.25
2-3' 4-gal. cans	3.95

Juniperus chinensis Pfitzeriana (Pfitzer's Juniper). Compact, dwarf spreading Juniper, very popular.

	Each	10
6-8" Bare-root	\$.35	\$2.50
18-24" B&B	2.50	
2-3' B&B	3.75	

Juniperus chinensis Pfitzeriana compacta (Nick's Compact Pfitzer).

	Each	10
6-8" Bare-root	\$.40	\$3.00

Juniperus chinensis Pfitzeriana glauca. (Blue-leaf Pfitzer).

The bluish foliage on this type of Pfitzer makes it especially attractive.

	Each	10
6-8" Bare-root	\$.40	\$3.00

Juniperus chinensis Femina. (Sylvestris Juniper). An attractive Juniper of pyramid shape, very hardy.

	Each	10
6-8" Bare-root	\$.35	\$2.50

Juniperus communis Kiyonoi. A compact and columnar form of English juniper, very tall and slender.

	Each
18-24" gal. cans	\$1.10
4-5' B&B	5.50

Pinus caribaea. (Slash Pine). Fastest-growing of the Southern Pines, and well suited for the coastal region. If your lot is bare, Pines will quickly provide shade and color.

Pinus echinata. (Shortleaf Pine.)

Pinus palustris. (Longleaf Pine.)

Prices of above three varieties:	Each
12-18" gal. cans	\$1.10

Podocarpus sinensis. (Japanese Yew). One of the largest-leaved conifers with leaves 3" long and a quarter-inch wide. Looks like a broad-leaved evergreen. Excellent for hedges, screens, specimens, or for the shrubbery border. Can be pruned to any desired shape. Will do well in both sun and shade.

	Each	10
8-12" Bare-root	\$.35	\$2.50
18-24" B&B	2.50	
2-3' B&B	3.50	

Thuja orientalis Aurea Nana. (Berckmanns Golden Arbovitae). A dwarf, compact Arbovitae with golden yellow foliage.

	Each
12-18" gal. cans	\$1.25

Thuja orientalis Bakeri. (Baker's Arbovitae). Grows in a pyramid shape, with light green foliage.

	Each
12-18" gal. cans	\$.90

PROTECTING PLANTS AND BLOOMS FROM COLD

Camellias and Azaleas may be grown in any cold climate if they are put in a greenhouse, sun porch, lighted cellar, room, cold frame or any other place which will give them adequate protection in cold weather. Camellias and Azaleas are widely grown in greenhouses in the northern portion of the United States. Where it is desired to move them outside during the growing season, they may be kept in containers. Plants growing out-of-doors can be given a great deal of protection from cold damage by planting them in a place where the sun will not strike them in the morning after a night of low temperature. A western or northern exposure is best in order to protect the plants from the morning sun. Additional protection can be afforded plants by erecting a framework over the plant and covering it with burlap or other material. Still additional protection may be given covered plants by placing a lighted electric bulb under the framework and cover.

LARGE SPECIMEN CAMELLIAS

We have over 200 varieties of large specimen Camellias from five to ten feet in height. These plants will provide at once a galaxy of blooms and massive landscape greenery, with no need to wait years and years for smaller ones to grow up. Plants are priced individually at the nursery. See them now.

Deciduous Trees and Shrubs

Albizzia julibrissin. (Silk Tree, "Mimosa"). Seen all over the South, this tree with feathery foliage and tips of pink flowers is indeed a sight in May and June. Hardy to Washington.

	Each	
12-18" gal. cans	\$1.00	

Chionanthus virginicus. (Fringe-tree, "Granddaddy's Gray Beard"). After the Azaleas have finished blooming this tree bursts out in its white fringe-like blooms.

	Each	
6- 8" qt. cans	\$.50	
12-18" gal. cans	1.00	

Cornus florida. (Dogwood). Ever-popular single white Dogwood.

	Each	10
12-18" Bare-root	\$. 35	\$2.50

Cornus florida Rura. (Pink Dogwood). Having showy pink bracts in the springtime instead of the usual white, this is indeed a worthwhile plant in every garden. Hardy to Massachusetts.

	Each	
18-24" grafts in gal. cans	\$2.00	
2-3' grafts in 4-gal. cans	3.00	

Hydrangea. Presumably the species **macrophylla**, the plants bear large clusters of pink or blue flowers, depending on the soil reaction. Acid soils produce blue flowers.

	Each	
12-18" gal. cans	\$1.10	

Lagerstroemia indica Rubra. (Crepe Myrtle). We have the scarlet Crepe Myrtle, summer-flowering shrub so popular everywhere. Pruning makes the new growth each year more compact and vigorous.

	Each	10
18-24" Bare-root	\$.60	\$5.00
18-24" gal. cans	1.10	

ORIENTAL MAGNOLIAS

Magnolia denudata. (Conspicua). Pure white oriental magnolia, flowers very large, measuring 6 to 8 inches, saucer shape.

	Each	
3-4' graft	\$7.50	

Magnolia soulangeana. (Saucer Magnolia, "Tulip Tree"). Flowers purplish pink, saucer shaped.

	Each	10
12-18" Bare-root	\$.60	\$5.00
12-18" gal. cans	1.00	
2-3' B&B	2.95	

Magnolia stellata. (Star Magnolia). Pure white, star-shaped flowers. Compact and spreading growth.

	Each	
18-24" B&B	\$3.50	

Spirea reevesiana. (Double Bridal Wreath). Covered with white flowers just at the end of Azalea time.

	Each	10
18-24" Bare-root	\$.50	\$4.00
18-24" gal. cans	1.00	

Misc. Plants and Grasses

Cocos australia. (Pindo palm). The best palm for this area.

	Each
18-24" B&B	\$2.95

Hedera helix. (English Ivy). Evergreen ivy used to cover masonry walls. Specify green or variegated.

	Each
Gal. cans	\$1.00

Ophiopogon japonica. (Monkey-grass, Dragon's Bread). Excellent grass for very shady locations, and widely used to border walks. Dark green the year round.

	Each	10	100
Qt. cans	\$.35	\$2.50	
Divisions			\$3.50

Trachelospermum jasminoides. (Confederate Jasmine, Star Jasmine). A beautiful evergreen vine, popular in the South. Delightfully fragrant.

	Each	10
Qt. cans	\$.50	\$4.00
Gal. cans90	8.00

Zoysia matrella. (Manila Grass). This is thought to be the best lawn grass for the South. Grows in shade as well as sun, and can stand a great deal of drought. Requires only a few mowings a year, as it is slow in growth. One square yard will plant 324 square feet of lawn, if 2" squares are put down every 12" in both directions.

	Each	10
Square yard	\$3.50	\$3.00

Note: Above Zoysia prices are f.o.b. the nursery. Add 20% for wrapping on orders to be shipped, minimum wrapping charge \$1.00. Special price quoted on large quantities, either at the nursery or delivered. Please specify number of yards desired and if you wish the Zoysia delivered.

Entrance to nursery on new four-lane U. S. 90, five miles southwest of Mobile city limits.

**WE ARE OPEN SUNDAYS
OCTOBER THROUGH APRIL**

Camellias are very attractive in tubs, pots, or cans in the patio or conservatory.

6-8" HINODEGIRI, 12-18" CHRISTMAS CHEER

BELLINGRATH GARDENS

Lovely Bellingrath Gardens, which is located on a road that enters Highway 90 just four miles southwest of the nursery, is truly a year-round garden spot of indescribable beauty. Mr. Walter Bellingrath, who, with the late Mrs. Bellingrath, founded the Gardens, likens their beauty to that of a lovely lady who has 52 different gowns, one for each week of the year. This is indeed true, for while Bellingrath Gardens attracts many thousands of persons daily during the lavish Azalea display in the springtime, no other season can rightfully be said to hold any less charm, for the Garden is a veritable haven for every sort of plant and flower that can be grown in the Deep South. Who can judge, really, whether the poignant quietness and peace of a summer day, cool underneath the towering moss-draped oaks, and high-lighted with colorful displays of roses and many other seasonal flowers, is more beautiful than, for instance, a brisk sunny November or December afternoon when each new turn reveals an exciting and different variety of Camellia in exquisite bloom, some towering over your head to twenty feet or more in height, and framed by broad green and blue vistas of lawn and water, with red-berried Pyracanthas and hollies blending into the background.

HOW FAR NORTH WILL AZALEAS AND CAMELLIAS GROW OUTDOORS?

We would not attempt to assign positive northern limits to the areas in which Azaleas and Camellias will grow outdoors, but we can make certain general observations, which may be helpful to persons contemplating the growing of these plants in areas they think might be too cold.

CAMELLIAS: We know of persons growing Camellias outdoors in Dallas, Memphis, Knoxville, Atlanta, and the Eastern Shore of the Chesapeake Bay. It is quite possible that Camellias are or will be grown outdoors further north than these points, but in any case we do not like to give great assurance of success at or beyond these places. The Sasanqua varieties are somewhat harder than the Japonica varieties, and persons in northern areas wishing to experiment with outdoor culture of Camellias might therefore have more success with the Sasankuas. However, if Japonica varieties are desired for growing outdoors in the northern areas, we recommend, in the following order of preference: 1). Early blooming varieties, which open a large portion of their blooms before cold weather arrives; 2). Late blooming varieties which have stamens to cushion the bloom buds as they expand and contract during the winter freezes and thaws; 3). Midseason varieties which have stamens. We do not recommend midseason or late blooming varieties which do not have stamens for outdoor growing in the northern areas.

AZALEAS: Azaleas and other Rhododendrons comprise so many different types and species that no general rule can be given. Some varieties, mainly deciduous, are hardy even as far north as Canada. But we can indicate something of the hardiness of the groups which we are presently offering for sale. The **Hardy Japanese Azaleas** are the hardiest, and can be grown over a large part of the United States, being much at home in Massachusetts, where some are deciduous. The **Kurume Azaleas** are the next hardy, being grown outside as far north as Long Island on the coast, and inland perhaps to the Ohio River. The **Pericat Azaleas** are almost as hardy as the Kurume varieties as far as standing cold is concerned, and it has been found that they will grow farther south (southern Florida) and stand more hot weather than the Kurume Azaleas. The **Indica Azaleas** are less hardy than the above three groups, being able to take about the same amount of cold as the Camellia Japonica.

PROTECTING PLANTS AND BLOOMS FROM COLD (see page 40)

WHEN SHOULD AZALEAS AND CAMELLIAS BE SET OUT?

Any plant may, strictly speaking, be "set out" or planted at any time of the year. The only time-restriction on moving plants is that there are certain plants which should not be dug during their period of active growth. In digging a plant many of the roots necessarily are cut, unless the ball is made so large that it includes all parts of the roots, which is not practical except in the case of a very small plant. Therefore, digging a plant will usually cut some of the roots. Should some of the roots be cut during the growing season, when the plant is depending upon its entire root system to keep it going, the plant will be shocked and set back to a greater or lesser degree, depending on the type of plant and the percentage of the root area pruned off. This loss of root area will retard the plant and in some cases even cause its death. Our container plants can of course be moved at any time even during the growing season.

CAMELLIAS are one of the plants for which it is advised not to dig them during their period of growth, which runs in this section from about April 1st to October 1st. However, they may be set out at any time, even while growing, if they were previously dug and burlapped or potted during the dormant period. Our practice is to carry a large selection of plants through the summer in burlap and in containers of various kinds, so that we can offer them for sale at any time of the year.

AZALEAS have particularly dense, compact root systems, and are very easy to move at any time of the year. However, during the hot summer months it is advisable to be a little more careful about watering newly set out plants and, if possible, to afford them some shade. Ordinary burlap tacked to 4 stakes will give them splendid protection from the hot sun.

MEMOS

We greatly value the suggestions and constructive criticisms from our customers in regard to our catalog, and request that you write in and tell us how we can use more accurate variety descriptions, nomenclature, or improve any other item.
